

Remote HW 6
Topic: Static Electricity

1. What is static electricity?
2. What matters?
3. What are the connections between static electricity and matter?
4. What is charge imbalance?
5. What is static discharge?
6. What types of materials have loosely bound electrons?
7. What happens when charge separation forms in the clouds?
8. How did Franklin make connections between lightning and electricity?
9. How did he test his theory: Lightning is electricity?
10. How did he identify charges?
